[illegible]

The Physics Department of the College of Natural Sciences, University of Puerto Rico, Río Piedras Campus, announces the search for candidates for a tenure-track position in experimental condensed matter physics, to begin August 1, 2021.

Requirements: Candidates must possess a Ph.D. degree in Physics from an accredited university, teaching experience at the higher education level, a good track record in research and publishing, a good command of English, and the ability to develop graduate and undergraduate courses in their area, demonstrable capacity to attract and mentor students, and a strong research agenda. Knowledge of cross-disciplinary research, Spanish and a proficiency in computer applications are desirable. Applicants must have a strong commitment to teaching excellent, diverse students, and demonstrate commitment to a collaborative research environment.

Responsibilities: The chosen candidate will be able to teach introductory and advanced courses both at the undergraduate and graduate levels, participate in the development of university-wide programs, create a competitive research agenda, and engage in collaborations with other groups. Supervise thesis, dissertations and professional practicum.

The Physics Department has a diverse faculty, including a mix of experimental condensed matter, Theoretical and Experimental Physics, with a track record of collaborations with groups and faculty from other departments and other institutions.

Applications with the following documents should be sent to the postal address, "[illegible]" [illegible] Sec. [illegible] PR 00931-3337, or by email to:

[illegible]

1. Cover letter
2. Updated Curriculum Vitae
3. Description of research interests
4. Description of teaching philosophy
5. Official academic transcripts for all degrees
6. Three letters of recommendation

The deadline to submit your documents will be April 16, 2021.
